

TWS Operation of Lift Trucks

Attention Managers - Health & Safety Supervisors

WorkSafeBC legislation requires all mobile equipment employees to receive adequate instruction in the safe operation of equipment specific to their workplace. This instruction includes both classroom and hands-on training.

Lift truck operator training must meet the requirements of the Canadian Standard Association, B335-15, "Industrial Lift Truck Operator Training." Under clause 6.21.3, the lift truck operator's practical performance must be assessed at least 18-month intervals by their supervisor/ employer. Re-training may be necessary if the supervisor determines there are shortcomings in the operator's performance.

Reference: <https://www.worksafebc.com/en/law-policy/occupational-health-safety/searchable-ohs-regulation/ohs-regulation/part-16-mobile-equipment>

WorkSafe BC requires employers and supervisors to be responsible for ensuring all workers are:

- Adequately trained and certified
- Provide direct supervision and correct unsafe acts/conditions
- Ensure only authorized, adequately trained workers operate equipment
- Maintain health and safety standards

Intended Audience - Course Overview

This course is intended for employees operating forklift/lift trucks in the workplace. Participants will receive comprehensive theory and practical training in machine capacity and stability factors, safe operation, loading/unloading procedures, inspections, site-specific equipment, and work requirements.

This course will verify employee understanding and demonstration of the concepts and methods as required in CSA B335 standards, manufacturers operating guidelines, and *WorkSafeBC OHSR Part 16: Mobile Equipment and related guidelines*.

Class Size

Up to 8 students per class.

Course Length

Approximately 8 hours

Registration Course Cost

Course costs may vary depending on the number of students and training location

Record of Training Certificates

TWS Record of Training Certificates come with a 3-year validation

Course Details

Each participant will be instructed on the safe operational procedures for forklift trucks under the manufacturer's operating guidelines, CSA standards, WorkSafe BC and Federal Regulations. Participants will receive up to one hour of one-on-one training on the lift equipment specific to their current job requirements. Participants will gain an understanding of the following:

- Federal and Provincial regulations
- CSA-related codes and standards
- Manufacturer's requirements and operator guidelines
- Pre-operational inspections
- Machine hazards
- Recognizing potential hazards
- Shutdown and storage procedures
- Equipment stability & capacity
- PPE and safety systems
- Classroom theory, Practical evaluation, and written exam
- Machine components, Safeguards, Controls
- Equipment types:
 - 3 - 5000 # s/d c/d Lift truck
 - 6 - 9000 # s/d c/b Lift truck
 - 10,000plus # s/d c/b Lift truck
 - Reach Fork/ Side Stacker/ Stock Pickers/ Stock Picker with Guide Wires/ Swing Reach Turret/ Walk Type Forklift/ Power Movers/ Rider Pallet Movers

About TeamWorks Solutions

When it comes to skills training and employee development, one thing is for sure; the more effective your training systems are, the better skilled and more productive your workforce will be. Whether you're national in scope or specialize in industry-specific markets, we can help. From training to curriculum development to supervisory leadership & due diligence, we'll work with you and your team to find the right solutions.

All TeamWorks Solutions industrial safety training courses meet Federal and Provincial legislation in British Columbia, which meets the requirements of WorkSafe BC, the Canadian Standards Association, and other applicable Authorities Having Jurisdiction.
