

SO-01 Cylinder Inspection & Requalification

Attention Managers - Health & Safety Supervisors

To requalify propane cylinders, your facility must obtain certification through Transport Canada. To complete this process, you must obtain an application form entitled "Application for Registration to Requalify Cylinders by External Visual Inspection Pursuant to CSA B339."

Reference: <https://www.tc.gc.ca/eng/tdg/moc-cylinder-visualguide-408.html>

WorkSafe BC requires employers and supervisors to be responsible for ensuring all workers are:

- Adequately trained and certified
- Provide direct supervision and correct unsafe acts/conditions
- Ensure only authorized, adequately trained workers operate equipment
- Maintain health and safety standards

Intended Audience - Course Overview

This course will meet Transport Canada's certificate requirements for LPG cylinder inspection and requalification based on the visual inspection method under CSA Codes B339-18, B149.2, and CGA Standards C-6, C-6.3. To requalify propane cylinders, your facility must obtain certification through Transport Canada, and it can only be performed by qualified persons.

Participants will comprehensively understand all topics included in the course content listed below. This course includes both classroom and hands-on training and a written and practical exam to verify knowledge of inspection, requalification, and remarking of refillable LPG cylinders.

A Record of Training (ROT) certificate will be issued upon successful completion of this course which is recognized by regulatory authorities across Canada. All TeamWorks courses meet the requirements of all Federal and Provincial legislation for British Columbia and the Territories. ROT certificates are valid for 3 years.

Class Size

Up to 10 students per class.

Course Length

Approximately 4 hours
