

TO-02 Propane Tank Truck Delivery

Attention Managers - Health & Safety Supervisors

CSA Code B149.2 5.2.1—States that “Propane shall only be transferred from one container to another by a person who is the holder of a certificate recognized by the Authority Having Jurisdiction.”

In British Columbia, Technical Safety BC states: “All persons engaged in dispensing propane must have a certificate of qualification for the purpose of dispensing propane, including the filling of propane cylinders and propane tanks recognized by the Gas Provincial Safety Manager.”

Reference: <https://www.technicalafetybc.ca/regulatory-resources/regulatory-notice/directive-recognized-certificates-transfer-propane>

WorkSafe BC requires employers and supervisors to be responsible for ensuring all workers are:

- Adequately trained and certified
- Provide direct supervision and correct unsafe acts/conditions
- Ensure only authorized, adequately trained workers operate equipment
- Maintain health and safety standards

Intended Audience - Course Overview

This course is intended for individuals who deliver and fill propane containers using a bulk delivery truck. Through a combination of theoretical instruction and hands-on training, participants will develop the skills needed to handle propane deliveries effectively and comply with industry standards and regulations.

A Record of Training (ROT) certificate will be issued upon successful completion of this course which is recognized by regulatory authorities across Canada. All TeamWorks courses meet the requirements of all Federal and Provincial legislation for British Columbia and the Territories. ROT certificates are valid for 3 years

Class Size

Up to 8 students per class.

Course Length

8 hours +
Graduated Driver Program

Registration Course Cost
